

## Victoria Crabb - Assignment 1

We want to consider what we can recognize in the object. What is it made of? What does the material, steel, allow us to do something with it? How can we hold it? Does the shape suggest possible uses?

The material of the object suggests that it's meant to be used for something that requires stability and durability. The sharp edges might mean something is being held from it or potentially it could cut something like thread or yarn.

List as many possible things you could do with it.

- Wrap embroidery floss around it (like an embroidery bobbin) for organization
- Letter opener
- Cutting tool/exacto blade
- Paper or note holder/organizer
- Fruit or vegetable peeler
- Straight edge
- Cover a computer's camera
- Pencil/colored pencil sharpener

- Palette knife (mix acrylic paints)
- Clay carving tool
- Keychain
- Crochet hook
- Tighten screws
- Door stop
- Deflating air pillows and packaging
- Nail cleaner
- Scraper for caulk or plaster
- Mini frosting smoother
- Could use multiple to make a wind chime
- Stirrer
- Seam ripper
